How could our programs be improved? What specific comments do you have regarding the curriculum?

1. Enable more learning by doing and working with real world projects. This gives and idea on how professionally run code looks like. You can achieve this by making them contribute to public projects like Wikimedia or opera foundation.
2. Enabling them to build applications with good frameworks like bootstrap, which gives them and idea of how good organized code looks like and how some of these will be used at different scales of the application.
3. Enable more alumni driven real world projects or have an optional elective which are taken entirely by the alumni. This will enable conversations around real world problems when they are in college itself.
