If you were dissatisfied with any aspect, please comment further:

How could our programs be improved? What specific comments do you have regarding the curriculum?

- While teaching the subjects to the students, try to relate it with the industry problem statement and how that can be solved using the topics that the students are studying.
- Conduct hackathons at regular intervals by giving a topic for the students by developing a proof of concepts.
- Most of the students when they join an organization, they will be working for any one of the industry specific projects. It would be good for the students to be productive sooner by including a subject to provide an overview on various domain such as banking, insurance, wealth management, retail, manufacturing, healthcare, life sciences, etc.
